Setting Up Electives: [https://cbase.som.sunysb.edu/cbase2/public/course\\_info/electives\\_info.cfm](https://cbase.som.sunysb.edu/cbase2/public/course_info/electives_info.cfm)

## Registering for Electives in CBase via **Paper Drop/Add**

Electives Course Search:	<a href="https://cbase.som.sunysb.edu/cbase2/public/course_roster/elective_search.cfm">https://cbase.som.sunysb.edu/cbase2/public/course_roster/elective_search.cfm</a>
The list of electives will populate, and you'll be able to see whether an elective is clinical vs non-clinical and whether the elective is "only paper drop/add."	
For departments that require use of a paper drop/add form, reach out to the course director/coordinator and express your interest in taking their elective and give them the dates you're available. If they approve, send them a paper drop/add form for signature.	<a href="https://cbase.som.sunysb.edu/share/docs/public/Drop-Add Form Fillable New Updated 2022.pdf">https://cbase.som.sunysb.edu/share/docs/public/Drop-Add Form Fillable New Updated 2022.pdf</a>  Signed drop/add forms need to be returned to <a href="mailto:Jeanine.fazzini@stonybrookmedicine.edu">Jeanine.fazzini@stonybrookmedicine.edu</a> for Dr. Strano-Paul's approval and entry into CBase.

## VSLO FAQs

### When do students get access to VSLO?

Students will get access to VSLO in December. An email with information on how to create an account will be sent directly from VSLO. Although you may have access to VSLO in December, you may not have the ability to apply to a particular institution because their elective catalogs may not be available. However, you can start creating your profile and application with the standard required documents. The opening of elective catalogues are handled by each individual institution and is not the responsibility of VSLO or the RSOM.

### How much do we pay for application fees?

The VSLO program charges a nominal fee for each application processed through VSLO. Additional application fees are set by each institution regardless of requested dates for that elective. We encourage you to investigate any institution-specific fees when deciding to apply for an away rotation.

### When are the catalogs for away opportunities published?

Most schools publish their catalogs between February and May. With few exceptions, the majority of institutions start their application process in April or May.

### **Where can I learn to use the VSLO system as a medical student?**

The AAMC offers annual VSLO (Visiting Student Learning Opportunities) training webinars for students. These sessions are available in December and February, with no cost to attend. Registration details will be sent out by the AAMC and will also be posted in TGIF. If you cannot attend a live session, the AAMC will post video recordings of the training on their VSLO website. While the VSLO system is designed to be user-friendly for students, home schools, and host schools, challenges may arise with site-specific requirements. To stay organized and ensure smooth applications, it's important to track the specific requirements for each school you are applying to.

<https://students-residents.aamc.org/attending-medical-school/vslo-application-student-training>

### **How do I get my transcript uploaded?**

Your application in VSLO must be completed first. The RSOM will upload your transcript prior to releasing your application(s).

### **How long does it take for my application(s) to be released by RSOM?**

In general, the turnaround time is 2-4 business days after the day of submission. If your application has not been released within 4 business days, please send an inquiry e-mail to [Jeanine.fazzini@stonybrookmedicine.edu](mailto:Jeanine.fazzini@stonybrookmedicine.edu)

### **Do VSLO schools require Letters of Good Standing (LOGS)?**

Typically, no. Good Standing is verified in VSLO by RSOM as part of the standard verification process, which includes malpractice insurance, completion of clerkships, projected graduation date, HIPAA, OSHA, etc. If a site requires a LOGS, we will comply if the school specifically requests it.

### **What immunizations should I get in preparation for away rotations?**

Most institutions will use the AAMC Standardized Immunization Form (SIF); however, this requirement is institution driven. Therefore, some of your away rotations may have their own institutional immunization form to complete.

### **What if the rotation requires a Letter of Recommendation (LOR)?**

These are not standard requirements. If the Host institution requires a LOR, you must then have the letter writer email an attachment of the LOR written on your behalf to [jeanine.fazzini@stonybrookmedicine.edu](mailto:jeanine.fazzini@stonybrookmedicine.edu), with your name on the subject line. The letter must come from the letter writer directly. Once received, it will be upload to VSLO. You will then be able to see the document designation in your VSLO portal and be able to assign it to the specific school(s). Please be advised that this document will remain private.

### **What if the away rotation that I applied for requires a Criminal Background Check (CBC) report?**

The standard verification question regarding CBC will be updated by RSOM to "yes" in VSLO. If the Host institution requires an official report, you can get one at [www.criminalwatchdog.com](http://www.criminalwatchdog.com). The CBC conducted when you first entered medical school CANNOT be used. Additionally, some schools may have their own CBC requirements.

### **What if the away rotation that I applied for requires a Drug Screening (DS) report?**

The standard verification question regarding drug screening will be updated by RSOM to "no" in VSLO. If the Host institution requires an official report, you can go to Student Health Services and have the screening done. Additionally, some schools may have their own drug screening requirements. If the Host institution requires a drug screening less than six (6) months old, please comply with their directions.

### **What if the away rotation that I applied for requires OSHA Certification within one year of scheduled rotation?**

The initial verification will be certified by RSOM in VSLO. If they require an official certificate, you can upload one to your "Documents" in VSLO. It is the student's responsibility to upload this certificate in VSLO upon request from the Host institution.

### **What if the away rotation that I applied for requires a copy my HIPAA Certificate?**

The initial verification will be certified by RSOM in VSLO. If they require an official certificate, you can upload one to your "Documents" in VSLO. It is the student's responsibility to upload this certificate in VSLO upon request from the Host institution.

**What if the away rotation that I applied for requires more liability insurance than what is currently provided to us?**

RSOM protects our students at a coverage of \$1M/\$3M per incident and aggregate respectively. If the rotation requires a higher coverage (ex. \$2M/\$5M), the student is responsible for the cost of the difference. This is a rare occurrence; however, should it happen, please email [Jeanine.fazzini@stonybrookmedicine.edu](mailto:Jeanine.fazzini@stonybrookmedicine.edu) for a company to contact.

**What if the away rotation that I applied for requires a copy of my BLS/ACLS cards?**

RSOM verifies your BLS/ACLS training in VSLO. However, if requested by your host institution, the student is responsible for uploading a copy of their BLS/ACLS cards.

**What if the away rotation that I applied for requires a copy of my Mask Fit Certificate?**

RSOM will certify Mask Fit in VSLO. However, if an official certificate is requested by the host institution, it is the responsibility of the student to upload it into your "Documents" in VSLO.

**Is my picture appropriate for the VSLO application?**

You should always use a professional-looking headshot photo on your application. The photo should not have you wearing hats or anything that may not be considered unprofessional. A suggestion is that you wear a professional top, suit jacket, or white coat in the picture. Have this picture available as an electronic file ready to be uploaded.

**What if the institution that I want to do my rotation with does not have an Affiliation Agreement with RSOM?**

This is important and should be taken into consideration by students when applying for an away rotation that requires a new Affiliation Agreement. Although we do not want students to be deterred from applying, the student must understand that affiliation agreements take time to be put into place, sometimes 2-3 months. If the student finds out that an Affiliation Agreement is needed, they must communicate with RSOM as soon as possible. Request form: [affiliate agreement](#).

**May I apply for rotations outside of VSLO?**

Yes. If you can't find a program on VSLO, that doesn't mean they don't have an away elective! Search online for the institution you're interested in and look at their visiting student webpage. Look for the course coordinator's contact info and ask for requirements / timelines if you can't find them. NYU, Columbia, and Stanford are common ones that RSOM students apply to that are not on VSLO. NYU's online information varies by specialty. If you find an opportunity outside of VSLO, the first step is to complete all required paperwork and submit everything to [jeanine.fazzini@stonybrookmedicine.edu](mailto:jeanine.fazzini@stonybrookmedicine.edu) so she can complete the application and submit everything on your behalf.

**Things to start taking care of before you apply, in the event they are required for your anticipated site:**

- BLS Card / ACLS Card
- Flu Vaccine Card (valid within one year)
- Proof of titers, PPD (valid within one year)
- Headshot photo
- Step 1 Score Report, if available; save to your computer upon receipt; get a replacement at <https://apps.nbme.org/nlesweb/#/records/orderHistory>. The RSOM verifies in VSLO that our students are not required to complete Step 1 until after clerkships. However, successfully passing Step 1 is a requirement to advance to Phase III (the 4th year).
- CV
- Immunization form <https://www.aamc.org/download/440110/data/immunizationform.pdf>. Complete before going to health services. A nurse can verify the immunizations without a physician. To see which of your vaccinations/titers student health has on file, go to: <https://stonybrook.medicatconnect.com/home.aspx>.
  - Some programs require their own immunization forms; check requirements.
  - You may need copies of vaccinations if you use an outside physician.
  - Try to have all programs' forms filled out to avoid going to SHS several times.
  - If a physical exam is involved, you'll need an appointment because a physician will be required.
  - Consider updating your SB Health Assessment while you are already at SHS; CBase > Resources > Downloads > Health Assessment Form
